Applications

Myst: Multi week capstone project. A single page application that has images, information, and up to date news for over 350,000 video games. People can find new games and connect with others. Users can upload videos/screenshots as well as personalize their profile and even add their live twitch stream.

Keeper: An image based social form which allows users to create and add pictures to boards as well as see other users pictures and boards.

Education

Codeworks (2021)

·Certificate of Completion
(Full stack software Development)
